We help organisations achieve more with their data in real-time and train teams to stay agile

## Training

Learn the skills you need to enhance your productivity when working with data.

## Consulting

Build Analytic Systems, Financial Models & Automate Business Processes to enhance our client's productivity & profitability.

dbrownconsulting has spent over 17 years developing its unique methodology that simplifies the process of building reporting & analytic solutions.

We believe the best people to build data driven solutions are the users themselves, so we work closely with users and transfer our methods as part of our solution.

With our approach we bridge the gap between IT and Business, helping you achieve more with your data.
